

## Smart Filler

The **SMART Filler** is a new addition to the BIG DRUM machinery line. This flexible and mobile in-line filler is perfect for running multiple products with limited floor space. Quick change-overs from one product to the next, maximizes up-time and efficiencies.

The SMART Filler is capable of running small to medium sized cups, sleeved cones, oval containers, screw ball containers, squeeze tubes, and pints. This new filler can be designed with standard mechanical lift stations or the more sophisticated servo drives.

It can be configured in a 2-Wide, 3-Wide or single lane version, depending on your product needs.

The SMART Filler has many off-loading options from simple flat belt conveying, cup collator, or a robotic transfer system. If you are looking for a high speed, small footprint, mobile, flexible, and reliable ice cream filler – the SMART Filler is the SMART CHOICE! The filler can be built for the production of any novelty product such as Cones, Cups, Oval Containers, Squeeze Tubes, Screw and Ball Containers.

## Technical specifications

### Electrical Requirements:

Country Specific

### Air Requirements:

5,0 Bar

### Key benefits:

- For the production of cups, cones, and other small containers
- All Stainless Steel construction
- State of the art Allen Bradley Compact Logics components & Touch Screen
- Direct Drive line shaft from indexer – no chain to tighten
- All Electrical and Pneumatics are above product area to ensure a clean and dry environment
- Main drive cabinet is sealed
- No pockets or tubular areas in which bacteria can hide and grow
- Easy access doors – can be opened to 30 degrees for quick inspection or removed for full access
- Carrier wash unit
